

JAI KIRAN R

Marketing Analyst | Digital Marketing Analyst | GA4 · SQL · Power BI · Excel
6363251891 · jaikivisual@gmail.com · linkedin.com/in/jaikiran-analyst · github.com/Jaikiran-Visual

PROFILE

MBA Marketing graduate (2026) who pairs marketing strategy with hands-on analytics: SQL, Power BI (DAX), and Excel. Built and queried a relational database, designed an interactive dashboard, and ran segmentation analysis to turn raw customer data into clear findings. Looking to bring this combination of marketing fundamentals and data tooling to a Marketing Analyst or Digital Marketing Analyst role.

KEY SKILLS

- **Analytics & BI:** SQL (HackerRank Silver) · Power BI (DAX, Slicers) · Excel (Pivot Tables, Power Query)
- **Marketing Analytics:** Google Analytics 4 (GA4) · Customer Segmentation · Dashboard Design · Data Storytelling
- **Marketing:** Digital Marketing · SEO · Inbound Marketing · Social Media Strategy

CERTIFICATIONS

- Google Analytics (GA4) — Google | May 2026
- Digital Marketing — HubSpot Academy | May 2026
- SQL (Silver Badge) — HackerRank | June 2026

PROJECTS

Bike Sales Data Analysis & Dashboard

Excel | 2025

- Used Pivot Tables and dynamic charts to analyze 1,000+ customer records, segmenting buyers by demographics and geography.
- Built an interactive Excel dashboard and identified middle-aged buyers (31–54) as the strongest-converting segment.

Bike Buyers SQL Analysis — Demographics & Purchase Behaviour

SQL · SQLite | June 2026

- Designed a relational schema and wrote 7 business-focused queries using window functions, CASE WHEN logic, and multivariable aggregations across 6 demographic variables.
- Found that short-commute customers (0–1 mile) converted at a notably higher rate than long-commute customers, consistently across income brackets.

Bike Buyers Power BI Dashboard — Interactive Analytics

Power BI · DAX | June 2026

- Built a 6-visual interactive dashboard with slicers for age, gender, occupation, income, and region; published live on Power BI Service.
- Created a DAX SWITCH calculated column for age-group segmentation, surfacing middle-aged North American professionals as the highest-volume buyer segment.

Note: all three projects analyze the same 1,000+ record bike-buyer dataset across three tools (Excel, SQL, Power BI), used as a self-directed portfolio to practice the full analytics workflow end to end.

EDUCATION

Master of Business Administration — Marketing

2024 – 2026

B.N. Bahadur Institute of Management Sciences (BNBIMS) | University of Mysore

Bachelor of Business Administration (BBA)

2021 – 2024

D Banumaiah's College of Commerce and Arts | University of Mysore
